SOP-SUP-03 Support Escalation

Fictional sample document created for an open-source demo.

Tier 1 responsibilities

Tier 1 agents handle order status questions, returns, and basic troubleshooting using the product guides.

Response time targets

Tier 1 answers emails within 1 business day and live chats within 2 minutes.

When to escalate to Tier 2

Escalate when an error code persists after the customer has reset the desk. Escalate any refund over $500, because it needs manager approval.

Safety concerns

If a customer reports smoke or a burning smell, tell the customer to unplug the desk immediately and stop using it, then escalate the ticket to Tier 2 as urgent.

How to escalate

Add the tag T2-escalate to the ticket and write a short summary of the steps already tried. Tier 2 responds within 4 business hours.
